TURNKEY ARENA SOLUTIONS

We create arenas for working businesses with any budget from scratch.

LASER TAG ARENA: FEATURES

Arena laser tag is played on special indoor arenas. Usually they are located in shopping malls or amusement parks. The laser tag arena is a maze consisting of shelters of different shapes and sizes, as well as all kinds of interactive elements.

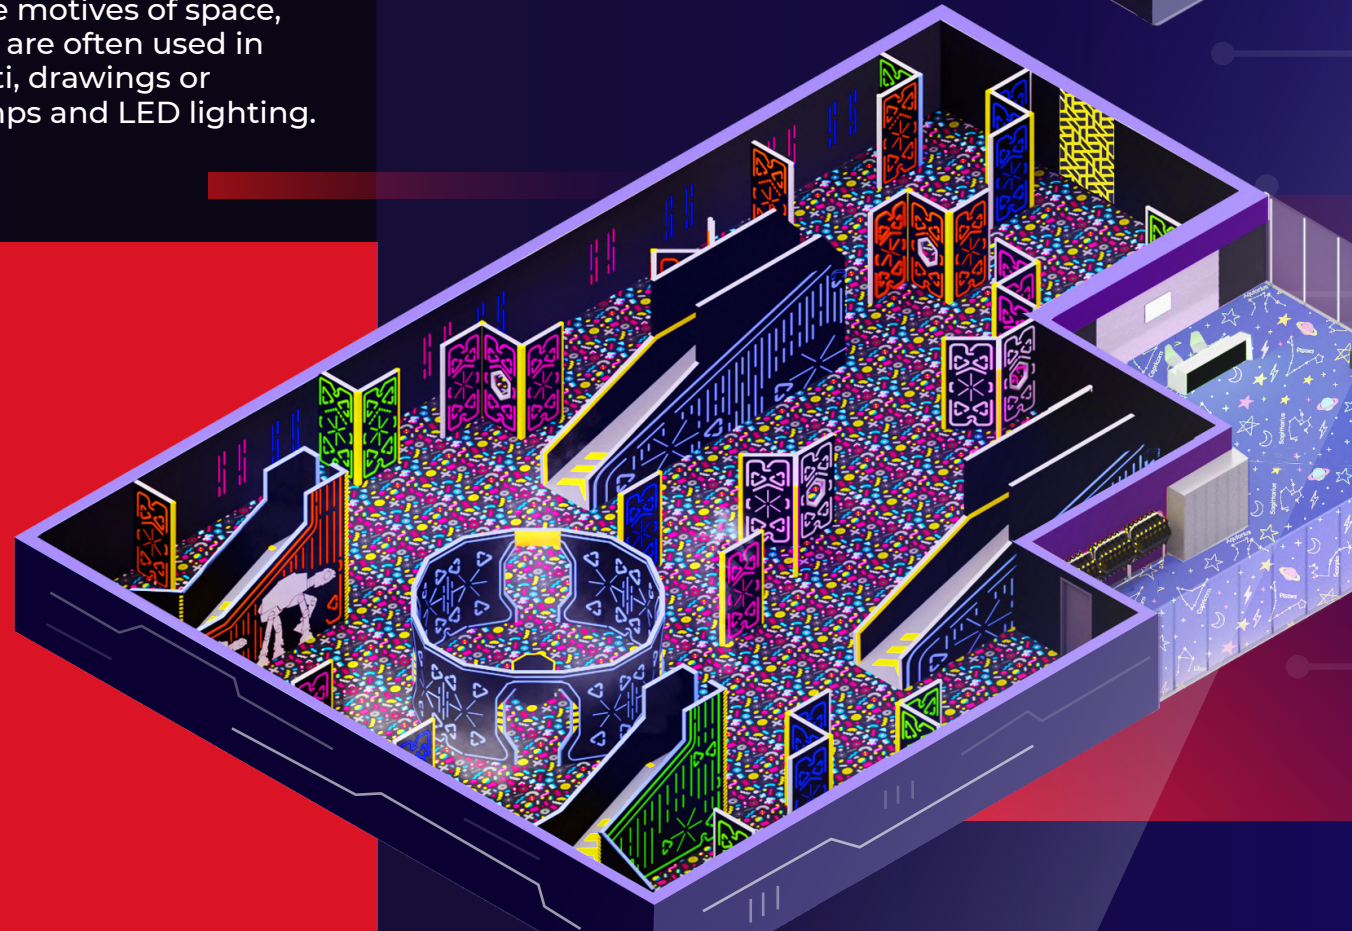

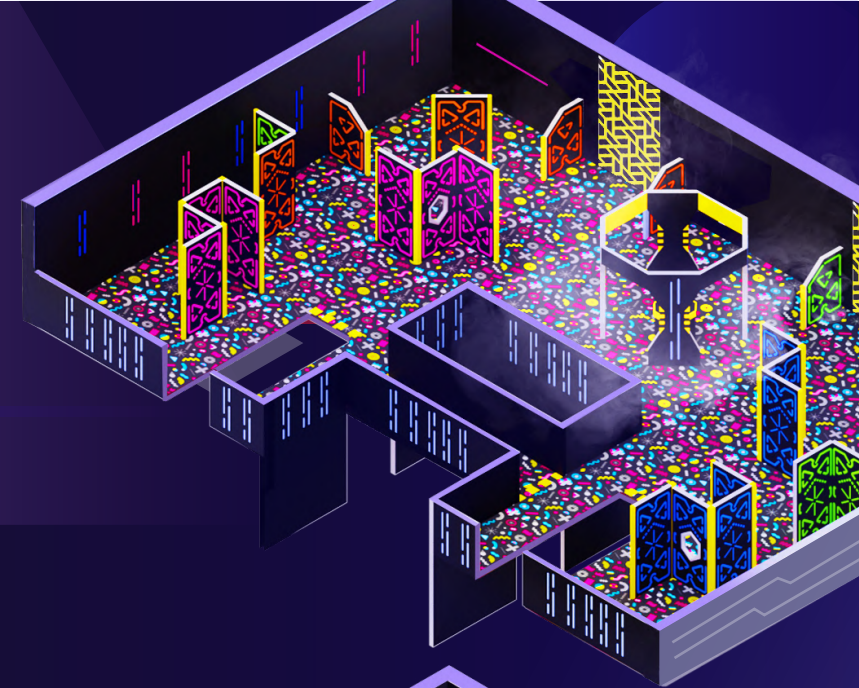

Twilight reigns in the arenas, where the IR rays of the taggers and the illumination of the vests are clearly visible. Owners of the maze use this factor as well for creation of spectacular design. The motives of space, fantasy worlds, famous sci-fi movies and PC games are often used in the design. Arenas are decorated with bright graffiti, drawings or luminous wallpaper, equipped with fluorescent lamps and LED lighting.

ENTRANCE AREA

A place designed to give customers maximum information about the attraction. At the entrance there are stands with information about prices, promotions and discounts, description of popular scenarios. The administrator meets the guests here.

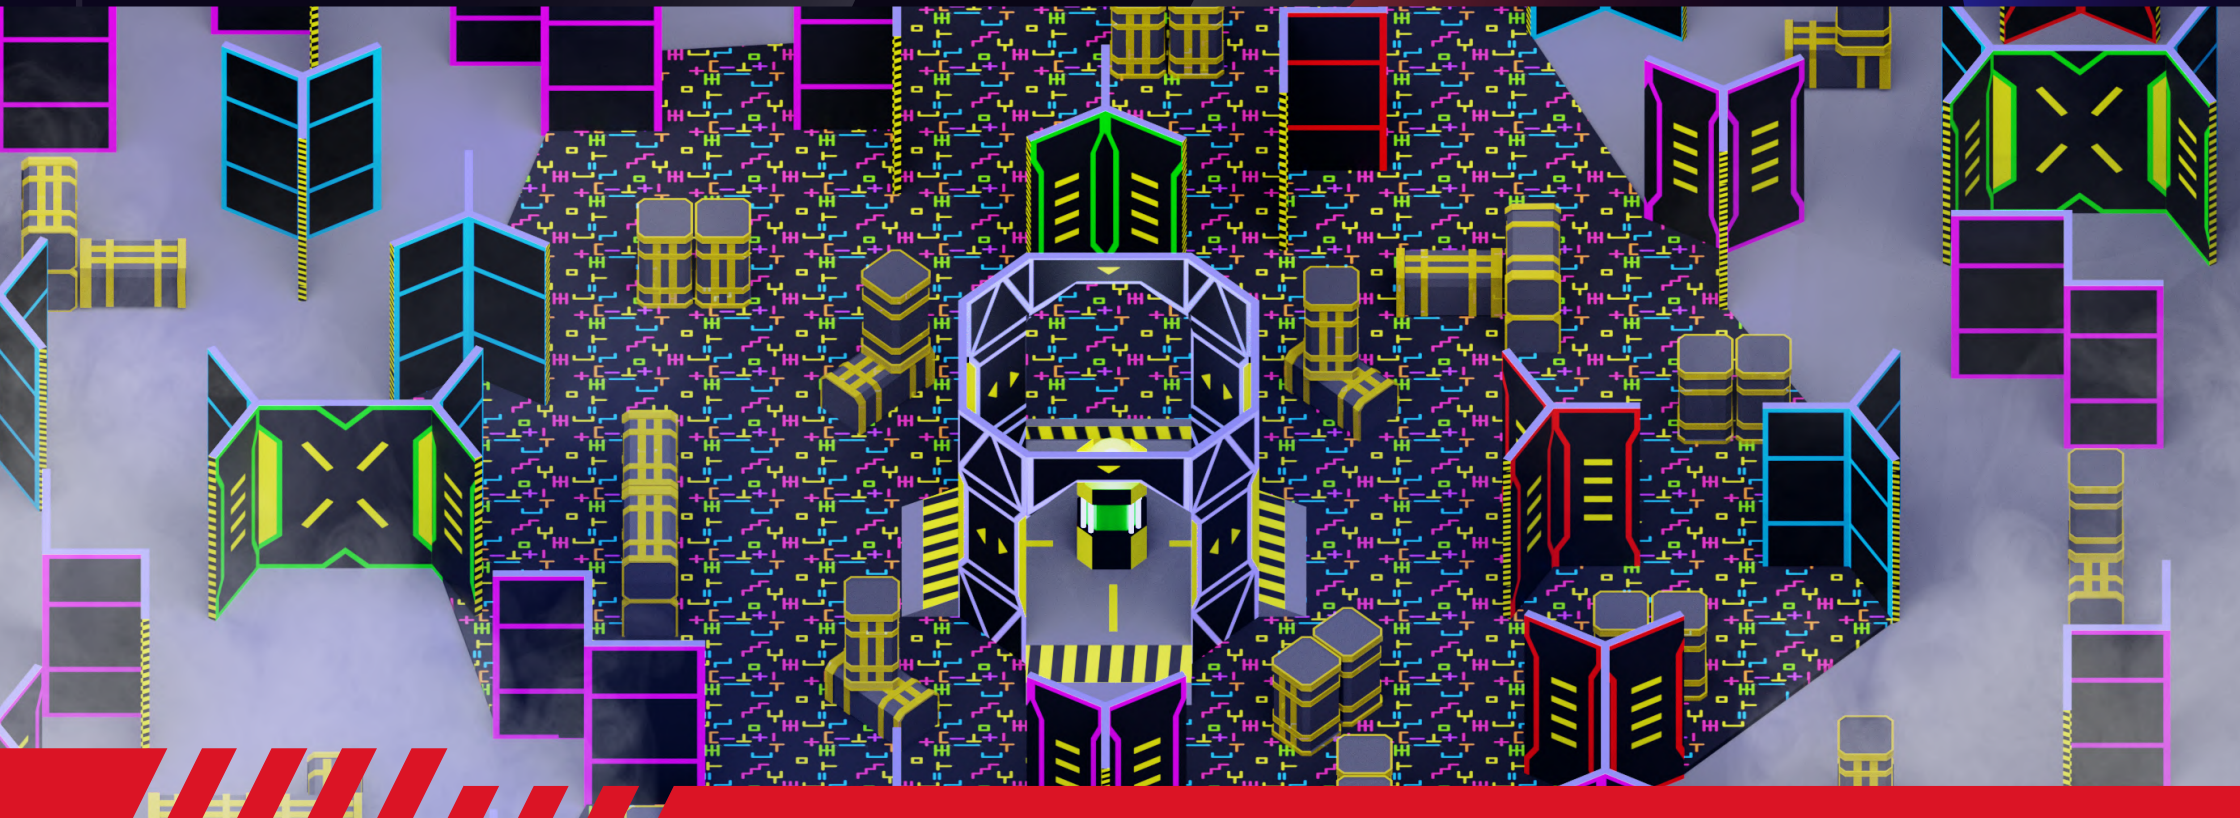

MAZE

It is a room with shelters and arena devices that allow you to play different scenarios.

WHAT ELSE COULD THERE BE AT A LASER TAG CLUB?

The rental club can include not only a laser tag arena. The site will be successfully completed by the attraction "Laser Maze". You can also plan a room for themed quests, VR-zone, room for 5D-cinema, billiard room, provide space for slot machines or game consoles. If the room allows, a cafe can be located on the premises of the rental club. The result will be a full-fledged entertainment center for people of all ages.

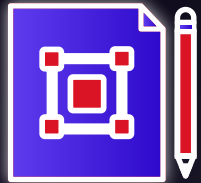

WE'LL HELP YOU START
A PROFITABLE BUSINESS!

WORKING PRINCIPLES

LASERWAR performs projects of any complexity and for any budget. We play laser tag ourselves and know exactly what the clients of rental clubs want. On our side we have advanced technology, professional designers and years of experience.

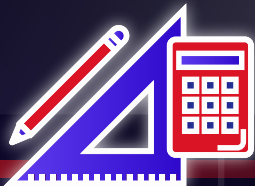

ANALYSIS

We analyze all initial data of the future arena: location and size, environment features, target audience, customer requests

IDEA

We define the theme of the playground. We zone the territory, select materials and technologies.

DESIGN

Here we visualize the idea. We create a design project that takes into account all the information received.

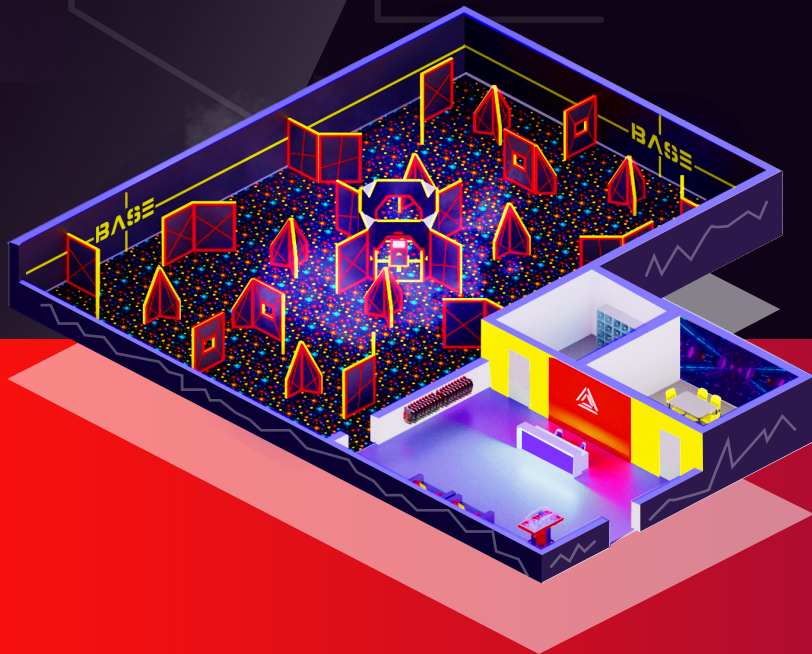

LAUNCH

A game arena will be created on the basis of the completed project.

WHY CHOOSE US?

LASERWAR is a professional developer of turnkey arenas. We take on the task of creating a site from scratch and delivering a working project to the client. We inspect the room, develop the general concept and design, provide the author's supervision during the construction process, install and adjust the equipment, help with the first game.

If you want to get a well-designed and decorated arena without wasting time and energy on learning all the details, entrust the work to LASERWAR specialists.

LASER ENTERTAINMENT CENTRE

Russia

450 m²

Arena in the style of the Star Wars movie. It is an irregularly shaped space, part of which is divided into smaller rooms. The site includes a reception, a two-level slot arena, slot machines, a banquet hall and a "Laser Maze" attraction. Posters, graffiti, moving figures, interactive elements belonging to the movie universe are used

LASER TAG ARENA

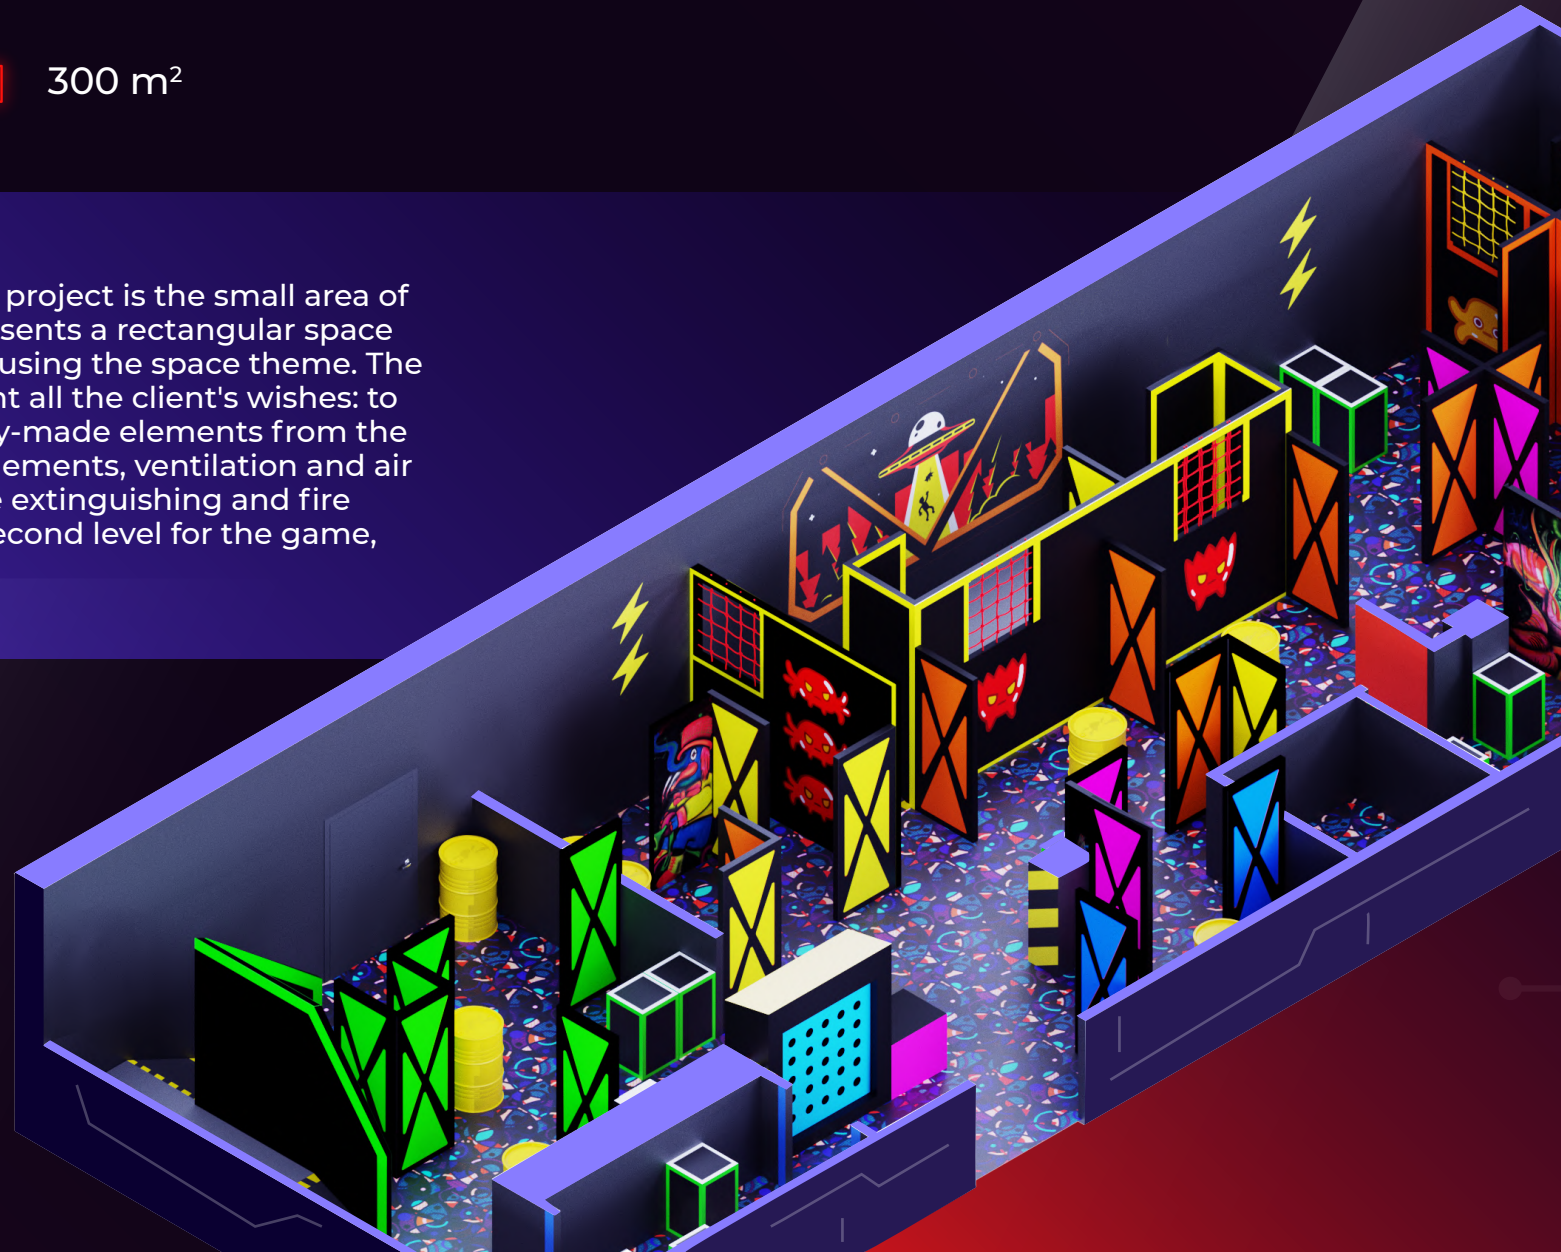

Spain

300 m²

The unique feature of the project is the small area of the original room. It represents a rectangular space that had to be decorated using the space theme. The designer took into account all the client's wishes: to maximize the use of ready-made elements from the past project, decorative elements, ventilation and air conditioning systems, fire extinguishing and fire alarm systems, create a second level for the game, create fewer partitions.

LASERWAR GAME ARENAS ARE
SUCCESSFULLY OPERATING AROUND THE GLOBE.
